We at EEPCON are steadfast to provide quality services of engineering, construction, manufacturing and third-party Inspections i.e. Asset Integrity Management, Advanced NDT, lifting equipment Inspection, Calibrations, QA/QC and certification trainings to our valued customers with aim to achieve maximum customer satisfaction and continual improvement.

Kashif Zaheer Alvi
CEO
00923334174410

Services:

- Third Party Inspection (Asset Integrity Management, Advanced NDT, Lifting Equipment Inspections, QA/QC Services, Calibration Services, Certification Training services)
- Engineering Manufacturing (Furnaces, Automation systems)
- Construction (Civil Structure Analysis E-Tab, SAP 2000)
- Trading (Import/Export, General Item supplies)

Manpower Certifications:

- ISO 9001:2015 (Quality Management System)
- American Society of Non-Destructive Testing (ASNT)
- Lifting Equipment Engineers Association (LEEA)
- Pakistan Engineering Council (PEC)

Industries

- Power & Energy
- Oil & Gas
- Manufacturing & Engineering
- Food & Beverages
- Chemicals/Fertilizers
- Refineries
- Drilling/Oil Field Services
- Others

Power & Energy

A lot of challenges and potential Threats when generating heat and electricity. As Pakistan leading engineering, construction and inspection company.

We believe in safe operations to sustain profitability

- a) Supply of Specialized equipment and accessories
- b) Engineering Design and manufacturing.
- c) Assets integrity services (steam/ gas turbine, HRSG, boiler Furness, steam generator, piping, Civil infrastructure)
- d) Construction (Civil infrastructure, installation and commissioning,
- e) Third party/ Stage inspection Services
- f) ISO17020, ISO17025, ISO9001:2015QMS implementation and auditing.

Our professional services help ensure that your operations and plants are in good condition. Analysing the remaining lifetime of your equipment and identify critical areas with the latest methods while the operation is running, will save your valuable resources in the long run. As Pakistan leading engineering, construction and inspection company. We believe in Safe Operations to sustain profitability

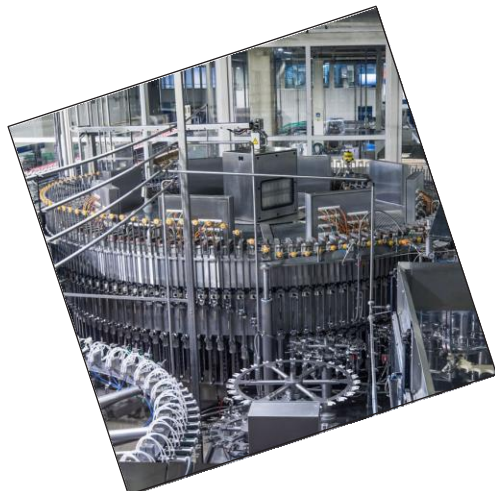

- a) Supply of Specialized equipment and accessories
- b) Engineering Design and manufacturing.
- c) Assets integrity services (**Well head assembly, piping, flare stack, fin fan coolers, exchangers vessels, tanks**)
- d) Construction (Civil infrastructure, installation and commissioning,
- e) Third party/ Stage inspection Services
- f) ISO17020, ISO17025, ISO9001:2015 QMS implementation and auditing.

Manufacturing & Engineering:

Qualified welders and welding methods, suitable and progressive non-destructive and destructive testing services as well as calibrations are essential to keep manufacturing flowing as smoothly as possible. As Pakistan leading engineering, construction and inspection company. We believe in Safe Operations to sustain profitability

Infrastructure includes,

- I. CNC (Milling, Lathe)
- II. EDM (wire cut, Conventional)
- III. Welding (SMAW, GTAW, EBW, SAW, FCAW, RW, GW and conventional)
- IV. Hydraulic Press
- V. Specialized Cutting process

Food & Beverage:

We help you manage safety and reliability issues in a systematic fashion to meet consumer needs. The emphasis is not merely on food safety, but also on installation of processes, which are mandatory for safe packaging.

In other words, we assist your team in minimizing the risks that affect your business. In factories, we can inspect and analyses all types of equipment and machines used in production and logistics; from fire extinguishers to refrigeration equipment, lifting gears, equipment and machinery and measurement devices.

Chemical / Fertilizers:

The chemical/fertilizer industry covers the basic raw materials ranging from oil, natural gas, air, water, metals and minerals to tens of thousands of finished products. The complex nature of this industry requires highly advanced equipment and difficult and dangerous logistics. We offer a wide range of cutting-edge solutions to clients in chemical/fertilizer industry. As Pakistan leading engineering, construction and inspection company. We believe in safe operations to sustain profitability

- a) Supply of Specialized equipment and accessories
- b) Engineering Design and manufacturing.
- c) Assets integrity services (Well head assembly, piping, flare stack, fin fan coolers, exchangers vessels, Tanks)
- d) Construction (Civil infrastructure, installation and commissioning,
- e) Third party/ Stage inspection Services
- f) ISO17020, ISO17025, ISO9001:2015QMS implementation and auditing

EEP CON
Innovative - Economical - Reliable

Refiners:

From construction to operation and maintenance, we provide a variety of inspection and data management services to ensure the integrity of your assets.

As Pakistan leading engineering, construction and inspection company. We believe in Safe Operations to sustain profitability

- a) Supply of Specialized equipment and accessories
- b) Engineering Design and manufacturing.
